Mission Impact: The preceding schedule was developed to minimize the impact on Air Force mission capability, while placing priority on closing or realigning the bases as recommended by the 1995 Base Closure Commission and directed by the Defense Base Closure and Realignment Act, P.L. 101-510. It is the Air Force's objective to close and realign the recommended bases at the earliest opportunity to take advantage of savings provided by reductions to Air Force end strength, reductions to base operating support costs, and where applicable, proceeds from the sale of real property at closure bases. The Air Force topline has been reduced by the savings associated with this closure round.

Environmental Considerations: BRAC 95 installations will continue to implement remedial actions in accordance with the Comprehensive Environmental Response Compensation and Liability Act (CERCLA). These actions include landfill closures, groundwater treatments, bioventing, air sparging, underground storage tank removals and free product removal. The BRAC 95 installations will also continue long term monitoring and operations associated with previous cleanup actions. Through FY2000, approximately 70% of the funding in the environmental program will support the implementation of cleanup systems and long term monitoring and

operations. By the end of FY2000 Roslyn ANG, NY, Reese AFB, TX, and O'Hare ARB, IL will have their last remedies in place. Completion of the environmental actions are crucial for the reuse and economic development of the affected communities. There are 8,453 acres to be transferred.

Other: Beginning in FY 2000, funding requirements for continuing actions at BRAC 88/91/93 bases are included in BRAC 95 as an add to the BRAC 95 program. Savings are included in Exhibit BC-02 for display purposes only, and have already been realized.

Conjunctively Funded Construction: N/A.

Family Housing Construction/ Operations: N/A.

Military Personnel - PCS: N/A.

Operation and Maintenance: \$101.4 Million. Funding for operation and maintenance (O&M) supports civilian personnel costs associated with closing the ALC and the Defense Logistics Agency (DLA). These civilian costs include annual leave, separation pay, severance pay, civilian unemployment and civilian PCS. The realignment and closure also requires moving costs and the "transportation of things" for AFMC, DLA and other tenants. Air Force Base Conversion Agency has O&M costs associated with maintaining an operating location including utilities and rents, civilian pay, and travel.

Other Procurement: N/A.

Revenues From Land Sales: \$2.8 Million. Proceeds are generated by land sales and leases from other BRAC actions. The proceeds will be used to offset requirements for this realignment.

Environmental: \$18.8 Million. Environmental investigations have identified 52 sites and three Areas of Concern at the installation. Site types include landfills, former fire training areas, radioactive waste disposal sites, Underground Storage Tanks, aircraft maintenance areas, sludge lagoons, and sludge drying beds. Metals, volatile organic compounds, and semi-volatile organic compounds have affected groundwater and soil at the installation. Low-level radioactive waste has contaminated soil. Environmental funds will be used for the installation of cleanup systems, studies, and the operation, maintenance and monitoring of existing systems for soil and groundwater. Final cleanup systems are expected to be completed by the end of FY2001.

Savings: Savings identified are generated by no longer operating the installation. They are included in exhibit BC-02 for display purposes only, and have already been realized.

10. Description of Proposed Construction: Interior alterations to include relocation and construction of interior non-loadbearing walls and replacement of interior finishes. Space includes: admin and warehouse storage in buildings 1530 and 1533.
Air Conditioning: 25 KW.

11. REQUIREMENT: As required.

PROJECT: Alters administrative and warehouse areas for new tenants.

REQUIREMENT: Because of the realignment of Kelly AFB, alteration of existing warehouse and administrative space is required to support the relocation of several functions from portions of Kelly AFB which will be excessed. This project will provide an adequate facility with properly configured administrative space, warehouse areas and equipment checkout space to support the new tenants.

CURRENT SITUATION: Several base functions that must be retained are currently located on a portion of Kelly AFB that will be excessed IAW the recommendations of the Base Realignment and Closure Commission. There is existing warehouse space on a portion of Kelly AFB being annexed by Lackland AFB that can be readily modified to support these relocated functions.

IMPACT IF NOT PROVIDED: Several base organizations will be unable to provide support to the retained portions of Kelly AFB because they will not have a facility out of which to operate.

ADDITIONAL: Funding is to be provided from the Base Closure Account. There is no criteria/scope for this project in Part II of the Military Handbook 1190, "Facility Planning and Design Guide." A preliminary analysis of reasonable options for accomplishing this project (alteration

11. REQUIREMENT: 475 SM ADEQUATE: 0 SUBSTANDARD: 475 SM

PROJECT: Alter facility for communications maintenance.

REQUIREMENT: Because of the realignment of Kelly AFB, alteration is required to support the relocation of telephone maintenance function from East Kelly areas that will be excessed. An adequate facility to provide office space and maintenance shops is required.

CURRENT SITUATION: The telephone maintenance shop, which supports both Lackland and Kelly AFBs, is currently located on a portion of Kelly AFB that will be excessed IAW the recommendations of the Base Realignment and Closure Commission. A suitable facility that can be altered is available on the portions of Kelly AFB that will be annexed by Lackland AFB to support this requirement.

IMPACT IF NOT PROVIDED: The base communications squadron will be unable to provide telephone maintenance support to Lackland AFB and the retained portions of Kelly AFB, resulting in adverse impacts to the day to day operations of both bases.

ADDITIONAL: Funding is to be provided from the Base Closure Account. There is no criteria/scope for this project in Part II of the Military Handbook 1190, "Facility Planning and Design Guide." Because the existing facility has such large hallways and large rooms, useable space will be more than normal in order to avoid removing "load bearing" walls. 10. Description of Proposed Construction: Modify, upgrade and repair interior walls, finish, HVAC and electrical systems. Construct exterior walls, finish, and utility systems as required. Concrete foundation and floor slab, structural steel framing, masonry walls, and standing seam metal roof. Includes admin offices, maintenance shop, mechanical and comm rooms, fire protection, parking, and necessary site improvements. Air Conditioning: 10 KW.

11. REQUIREMENT: 3,617 SM ADEQUATE: 1,839 SM SUBSTANDARD: 288 SM
PROJECT: Adds to and alters administrative and shop areas in the 37th Civil Engineer Squadron for realigned CE personnel(bldg 5595).
REQUIREMENT: Due to the realignment of Kelly AFB, alteration of and an addition to building 5595 are required to support the relocation of sever functions from portions of Kelly AFB that will be excessed. This project will provide adequate facilities with properly configured administrative space, warehouse areas and CE shop space to support the expanded mission of the 37th Civil Engineering Squadron.
CURRENT SITUATION: The current civil engineer complex at Kelly AFB is located on land that will be excessed IAW the recommendations of the Base Realignment and Closure Commision. Since many functions currently on Kelly AFB will remain and become the support responsibility of Lackland AFB, the mission of the Lackland Civil Engineer Squadron will increase significantly.
IMPACT IF NOT PROVIDED: The Lackland 37th CES will be unable to provide adequate civil engineering support due to the increased responsibility resulting from the Kelly AFB realignment, thus jeopardizing their mission accomplishment.

PACKAGE DESCRIPTION**

U. S. Air Force Depot/Kelly Air Force Base, Texas

Closure Package: Kelly Air Force Base will realign by 13 Jul 2001. Consolidate workload to other DoD depots or to private sector commercial activities, as determined by the Defense Depot Maintenance Council.

One Time Implementation Costs:

Military Construction:

<u>State/Installation</u>	<u>Project Title/#</u>	<u>Fiscal Year of Award</u>	<u>Auth Amount (\$000)</u>	<u>Appn Amount (\$000)</u>
Texas/Ft Sam Houston	DRMO Complex/CNBC999991	2001	12,800	12,255
Total 2001			12,800	12,255

Conjunctively Funded Construction: N/A.

Family Housing Construction/ Operations: N/A.

Military Personnel - PCS: \$1.9 Million. Funding supports Military personnel permanent change of station costs associated with closing the Air Logistics Center (ALC).

Operation and Maintenance: \$204.4 Million. Funding for operation and maintenance (O&M) supports civilian personnel costs associated with closing the ALC and the Defense Logistics Agency (DLA). These civilian costs include annual leave, separation pay, severance pay, civilian unemployment and civilian PCS. The realignment and closure also requires moving costs and the "transportation of things" for AFMC, DLA and other tenants. Air Force Base Conversion Agency has O&M costs associated with maintaining an operating location including utilities and rents, civilian pay, and travel.

Other Procurement: N/A.

Revenues From Land Sales: \$2.8 Million. Proceeds are generated by land sales and leases from other BRAC actions. The proceeds will be used to offset requirements for this realignment.

Environmental: \$11.9 Million. Environmental investigations have identified 52 sites and three Areas of Concern at the installation. Site types include landfills, former fire training areas, radioactive waste disposal sites, Underground Storage Tanks, aircraft maintenance areas, sludge lagoons, and sludge drying beds. Metals, volatile organic compounds, and semi-volatile organic compounds have affected groundwater and soil at the installation. Low-level radioactive waste has contaminated soil. Environmental funds will be used for the installation of cleanup systems, studies, and the operation, maintenance and monitoring of existing systems for soil and groundwater. Final cleanup systems are expected to be completed by the end of FY 2001.

Savings: Savings identified are generated by no longer operating the installation. They are included in exhibit BC-02 for display purposes only, and have already been realized.

11. REQUIREMENT: As required. PROJECT: Construct a Defense Reutilization and Marketing Office(DRMO). REQUIREMENT: The BRAC 95 Base Closure Commission directed that Kelly AFB be realigned. New facilities must be constructed to replace those existing at Kelly AFB. CURRENT SITUATION: The current DRMO exists in facilities and land that will be transferred to other private organizations under the privatization in place concept. Military installations and other Federal generators in the greater San Antonio area are Fort Sam Houston, Lackland AFB, Randolph AFB, Brooks AFB, and 750 other small areas. Fort Sam Houston has a surplus of warehouse space but a deficit of adequate space. DRMO in San Antonio is the only reutilization and marketing service in the area. The next nearest complex is located at Fort Hood, 150 miles north. IMPACT IF NOT PROVIDED: The realignment of DRMO cannot occur unless these facilities are constructed. ADDITIONAL: Funding is to be provided from the Base Closure Account. There is no criteria/scope for this project in Part II of Military Handbook 1190, "Facility Planning and Design Guide." BASE CIVIL ENGINEER: Lt Col Larry Brittenham (210) 671-2977/78. SIOH costs are annualized in accordance with the current outlay rates experienced by the Air Force.

The closure also requires moving costs and the "transportation of things" for AFMC, DLA and other tenants. Air Force Base Conversion Agency have O&M costs associated with maintaining an operating location including utilities and rents, civilian pay, and travel.

Other Procurement: N/A.

Revenues From Land Sales: N/A.

Environmental: \$34.6 Million. Environmental contamination at the installation has resulted from underground storage tanks, fire training areas, dumps near industrial operations, landfills, leaks near industrial waste lines, and surface spills. A study in FY 1979 detected groundwater contamination that led to the closure of two on-base and three off-base drinking water wells. In addition to 18 acres of soil contamination in the vadose zone, three large plumes of contaminated groundwater have been identified.

Savings: Savings identified are generated by no longer operating the installation. They are included in exhibit BC-02 for display purposes only, and have already been realized.
